GROUP 2 · FINAL PROJECT REVIEW

Employee Management System

One workforce.
Three clear roles.

Liang Bangyu · Li Yuanxiang
Liu Yixuan · Liu Shuai

Local HR workbench · Fictional demonstration data

Meiti Shangcheng · 28 October 2026 · Local release 2.1.0-flask

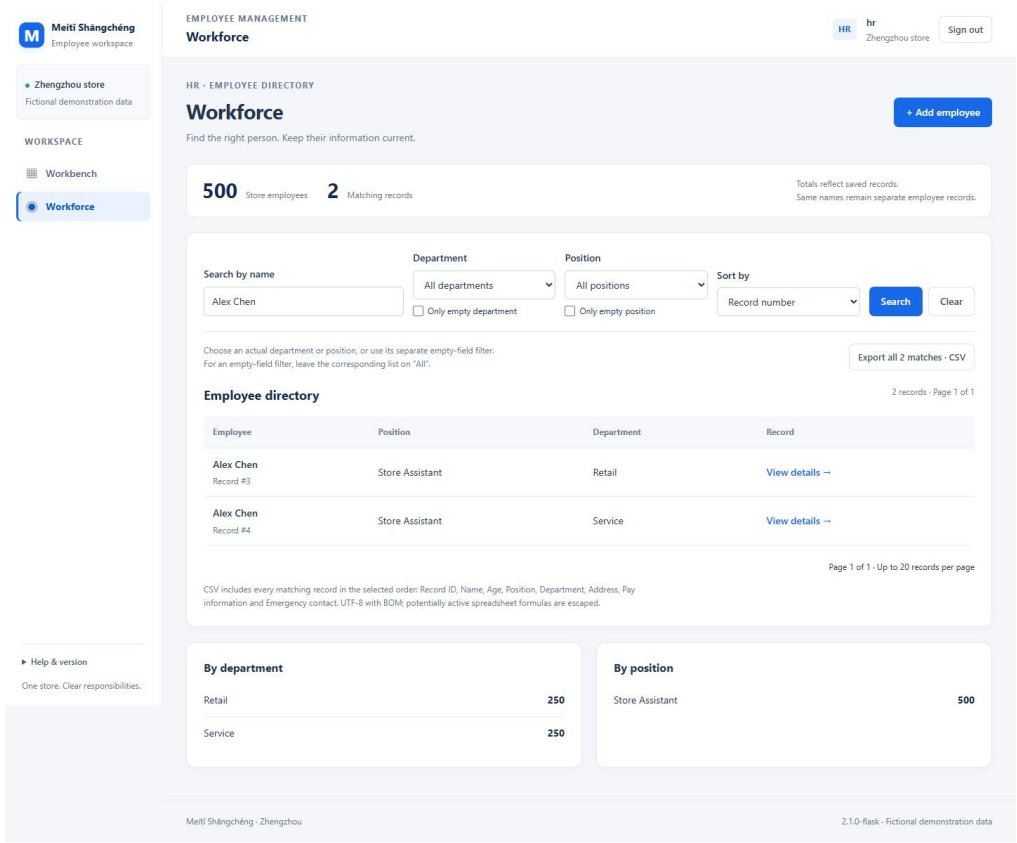

The client problem

Keep records current

See the workforce clearly

Arrange dependable shifts

A clear, persistent employee workspace.

HR directory · Fictional test data

Clear roles, focused scope

HR

Manage employee records

Find · filter · export

Supervisor

Schedule their own team

Manual draft · review

Employee

View own shifts and check in

Own shifts · history

Scoped access. Valid weeks. Saved records.

Excluded: inventory, automatic scheduling and payroll processing.

Five deliverables, one release

01

Project Plan

Scope and delivery

---

05 · Scrum board Tasks, owners, acceptance conditions and evidence

Python + Flask + SQLite + Jinja

Server-rendered forms and navigation · No JavaScript

Five business models, one request

`User`	`Employee`	`Team`	`ScheduleWeek`	`CheckIn`
Signed-in identity	Seven info groups	Supervisor scope	Complete team week	Signed operation

Create an employee

HTML form → **Flask route** (Role + CSRF) → `Employee` (Validate) → **SQLite** (Write data) → **Rendered page** (Redirect / render)

Five models. workspace.py holds query, date and CSV helpers; see the Class Diagram for details.

Three workflows, live

01 · HR

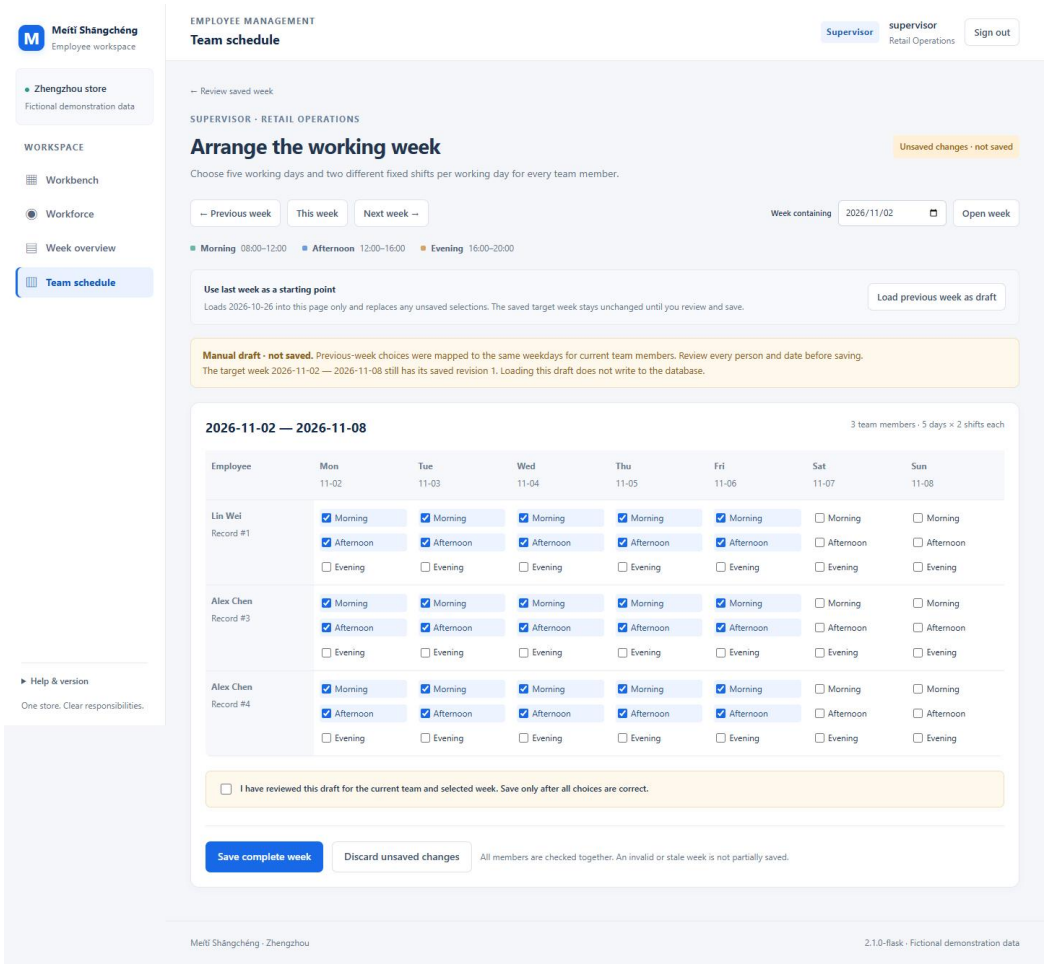

Find a record

02 · SUPERVISOR

Load a draft without saving

03 · EMPLOYEE

View own work and history

2 min 30 sec · Unsaved draft · Fictional data

Technical evidence, clear limits

40

Core regression

Flask + SQLite

26

Enhanced checks

Role workflows

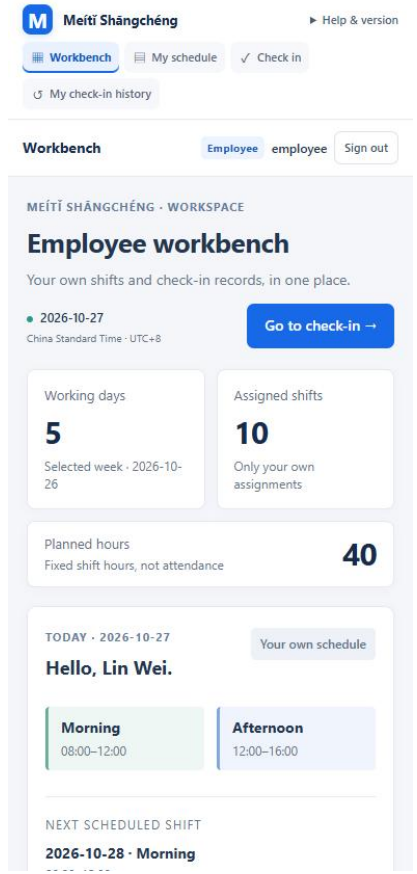

13

Browser checks

JavaScript off

JavaScript disabled

Local technical verification.
Independent users and client acceptance remain pending.
Mobile: viewport emulation. Network sources: simulation.

Code and documents
Technical checks

Members review, explain and rehearse.

Confirm actual contributions before presenting · Local board records files and evidence from 26 October.

What changed, and why

Role workspaces → **clearer navigation**

Previous week → **unsaved manual draft**

CSV text → **formula-safe handling**

Next: independent user testing and a timed team rehearsal.

Ready for client review

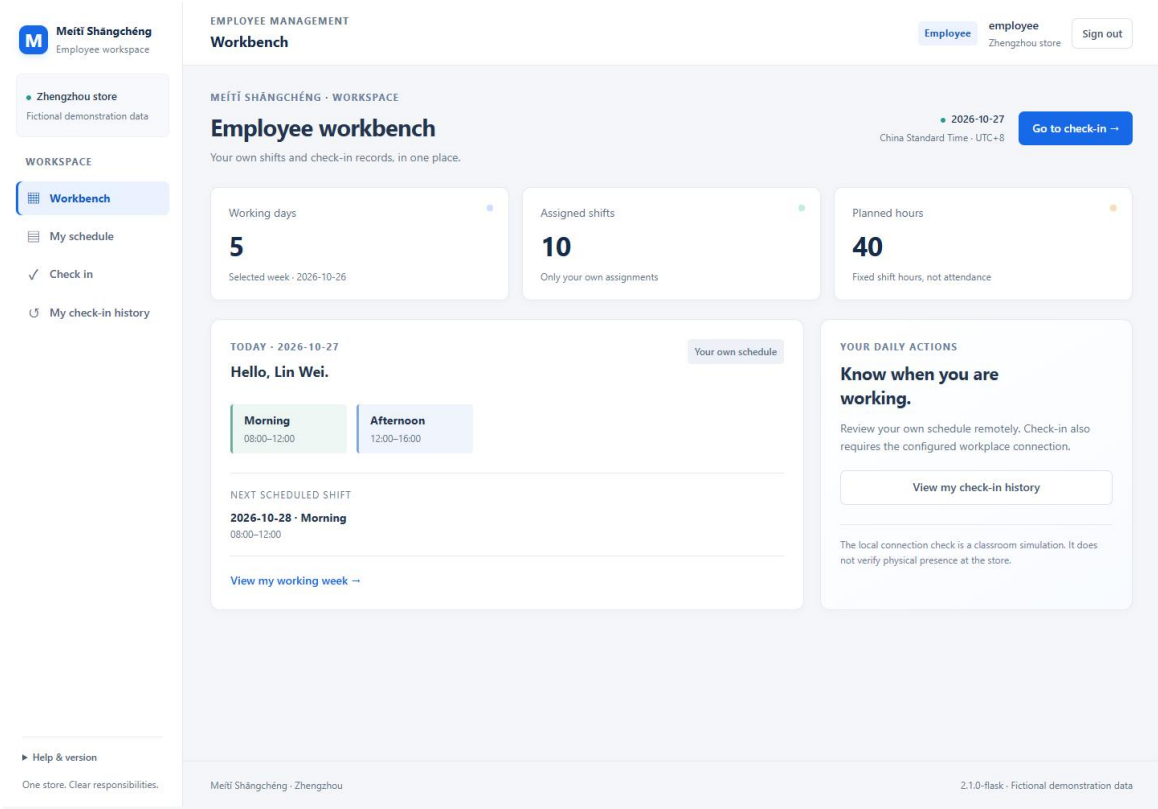

Five deliverables.
One local release.

Demonstrate the identified release

Record findings

Agree corrections

Thank you. Questions are welcome.
